Public Notice – Placement of Communal Bear-Proof Garbage Bin for 2019

The City of Rossland is supporting the placement of a Communal Bear-Proof garbage dumpster on Ministry of Transportation and Infrastructure land in the parking lot of the Rossland Museum. This bin will provide the public with 24/7 access to dispose bear attractant household garbage. The bin will be on location until late fall.

Non-Profit society, Natural Control Alternatives (NCA) owns and pays for twice weekly emptying of the 6-yard bin by partner Alpine Disposal and is relying on users to offset the costs of tipping fees.

The suggested tip is \$4 per bag, the fee charged per bag at McKelvey Creek Landfill in Trail.

NCA is a small society, dedicated to minimizing the negative impacts of development on wildlife, and advocate for natural ecosystem balance. Besides the bear-proof bin site clean-up, NCA volunteers are researching and using non-lethal control methods on burrowing rodents in the City of Trail sites and Selkirk College, Castlegar.

For service requests and/or additional information on this initiative please call NCA representatives at

1 (250) 231-6436.
