

IMPORTANT NOTICE

FROZEN WATER LINES

Due to consistently colder than normal temperatures during the month of February, residents are experiencing frozen water lines inside their homes. Any unheated crawl space or exterior wall is causing the lines to freeze on the home owners' side.

With the increased number of calls the City has received, the City is advising home owners to please leave a tap running at approximately one to two cups per minute until the end of the month.

If you have any questions related to above, please feel to call the Public Works office at 250-362-2328.

Thank You for your continued co-operation in this matter.

Thank you.
